

STEP-BY-STEP: Push to GitHub & Deploy on Railway

Your GitHub Username:

abhishektiware160906-dev

FILES YOU NEED

All these files should be in one folder:

```
quitecapital-outreach/  
├─ quitecapital_backend.py  
├─ quitecapital_frontend.jsx  
├─ requirements.txt  
├─ .env.template  
├─ Procfile  
├─ runtime.txt  
├─ README.md  
└─ .gitignore
```

STEP 1: Create GitHub Repo

1a. Go to GitHub

- Visit <https://github.com/new>
 - **Repository name:** `quitecapital-outreach`
 - **Description:** AI-powered restaurant outreach platform with Email + SMS + WhatsApp
 - **Public** (so Railway can access)
 - **Create repository**
-

STEP 2: Prepare Files Locally

Option A: Using Command Line (Recommended)

1. Create project folder:

```
mkdir quitecapital-outreach  
cd quitecapital-outreach
```

2. Download ALL files from `/mnt/user-data/outputs/` :

- `quitecapital_backend.py`
- `quitecapital_frontend.jsx`
- `requirements.txt`
- `.env.template`
- `Procfile`

- runtime.txt
- README.md

3. Place them in the folder

STEP 3: Create Additional Files

Create `.gitignore`

```
# In the quitecapital-outreach folder,  
create file: .gitignore
```

Content:

```
__pycache__/  
*.py[cod]  
*$py.class  
*.so  
.env  
.DS_Store  
*.db  
quitecapital.db  
venv/  
env/  
.vscode/  
.idea/  
node_modules/  
*.log
```

```
dist/  
build/
```

Verify Files

```
ls -la  
# Should see: quitecapital_backend.py,  
requirements.txt, Procfile, README.md,  
.gitignore, etc.
```

STEP 4: Push to GitHub

Using Command Line:

```
# Navigate to your project folder  
cd quitecapital-outreach  
  
# Initialize git  
git init  
  
# Add all files  
git add .  
  
# Create first commit  
git commit -m "Initial commit: QuiteCapital  
Outreach Platform - ready for Railway  
deployment"  
  
# Add remote (replace YOUR_USERNAME with:
```

```
abhishektiware160906-dev)
git remote add origin
https://github.com/abhishektiware160906-
dev/quitecapital-outreach.git

# Push to GitHub
git branch -M main
git push -u origin main
```

If Git Not Installed:

Download Git from: <https://git-scm.com/>

✅ STEP 5: Verify on GitHub

1. Go to: <https://github.com/abhishektiware160906-dev/quitecapital-outreach>
 2. You should see all files:
 - ✅ quitecapital_backend.py
 - ✅ requirements.txt
 - ✅ Procfile
 - ✅ README.md
 - ✅ .gitignore
 - ✅ runtime.txt
-

🚀 STEP 6: Deploy on Railway

Method 1: Direct Link (1 Click)

Click this link:

```
https://railway.app/new?
repo=https://github.com/abhishektiware160906-dev/quitecapital-outreach
```

Method 2: Manual on Railway.app

1. Go to <https://railway.app>
2. Login/Sign up (free)
3. Click "New Project"
4. Select "Deploy from GitHub"
5. Authorize Railway to access your GitHub
6. Select: `abhishektiware160906-dev/quitecapital-outreach`
7. Select Python environment
8. Deploy!

STEP 7: Add Environment Variables on Railway

After deployment starts, go to Railway dashboard:

1. Click your project
2. Click "Variables" tab

3. Add these environment variables:

```
RESEND_API_KEY=re_Um464pMw_hDutC5whLpK8m6zd  
ebvR3Er3
```

```
TWILIO_ACCOUNT_SID=AC6017d3a5097b5ce126fc44  
d292a5ce82
```

```
TWILIO_AUTH_TOKEN=TYV55GXNADK4TEEXDT5HTX18
```

```
TWILIO_PHONE=+919938455252
```

4. **Save**

5. Railway auto-redeploys with variables

✨ STEP 8: Verify Deployment

Railway will show:

- ☒ Build successful
- ☒ Deployment successful
- ☒ App URL: `https://your-app.up.railway.app`

Test the platform:

1. Go to: `https://your-app.up.railway.app/docs`
(API documentation)
2. Should see FastAPI Swagger UI

3. Platform is LIVE! 🎉

What Happens Next

Upon deployment:

- ✓ FastAPI backend starts
 - ✓ SQLite database initializes
 - ✓ Campaign with 7 restaurants created
 - ✓ Message 1 sent via Email + SMS + WhatsApp
 - ✓ Dashboard available
 - ✓ Response tracking active
 - ✓ Auto 24-hour follow-ups scheduled
-

Troubleshooting

Issue: "Repository not found"

- Make sure GitHub repo is **public**
- Double-check username:
`abhishektiwari160906-dev`
- Verify repo name: `quitecapital-outreach`

Issue: "Build failed"

- Check Procfile exists
- Check requirements.txt exists
- Verify Python files have no syntax errors

Issue: "Environment variables not set"

- Add them in Railway dashboard BEFORE deployment
- If already deployed, add them and Railway auto-redeploys

Issue: "App crashes after deploy"

- Check Railway logs
- Verify all environment variables are set
- Check for typos in API keys

Access Your Platform

After successful deployment:

```
API Backend: https://your-  
app.up.railway.app  
API Docs: https://your-  
app.up.railway.app/docs  
Dashboard: https://your-  
app.up.railway.app/dashboard
```

QUICK COMMAND SUMMARY

If you just want to copy-paste commands:

```
# 1. Create folder and navigate
mkdir quitecapital-outreach && cd
quitecapital-outreach

# 2. Download/copy all files into this
folder

# 3. Initialize git
git init
git add .
git commit -m "Initial commit: QuiteCapital
platform"

# 4. Add GitHub remote
git remote add origin
https://github.com/abhishektiwari160906-
dev/quitecapital-outreach.git

# 5. Push to GitHub
git branch -M main
git push -u origin main

# 6. Deploy on Railway
# Go to: https://railway.app/new?
repo=https://github.com/abhishektiwari16090
6-dev/quitecapital-outreach
```

 **You're Done!**

Your QuiteCapital platform will be:

- ✓ On GitHub
- ✓ Deployed on Railway (free tier)
- ✓ Running 24/7
- ✓ Sending automated campaigns
- ✓ Tracking responses in real-time

Total time: 10-15 minutes ⚡

Need help? You have all the files ready. Just follow the steps above! 🚀
